

Made in America Material Certification

This is to certify that all PVC pipe, HDPE pipe, and MDPE pipe manufactured by JM Eagle is compliant with the Build America, Buy America Act (BABAA) requirements under Title IX of the Infrastructure Investment and Jobs Act ("IIJA"), Pub. L. 177-5, at any one of the seventeen U.S.A. manufacturing plants:

- Adel, Georgia
- Batchelor, Louisiana
- Cochran, Pennsylvania
- Columbia, Missouri
- Fontana, California
- Hastings, Nebraska
- Kingman, Arizona
- Magnolia, Arkansas
- Perris, California
- Pueblo, Colorado
- Stockton, California
- Sunnyside, Washington
- Tulsa, Oklahoma
- Umatilla, Oregon
- Visalia, California
- Wharton, Texas
- Wilton, Iowa

PVC, HDPE, and MDPE resins, the primary material in our products, are 100% made by companies in plants located within the United States of America. Due to lack of domestic options capable of meeting our requirements, our pipe seal gaskets are sourced from vendors located outside of the United States. Extruded plastic pipe with gasket is classified as a manufactured product.

Based on Section 70912(6)(B)(ii) of the BABA Act, as long as "the cost of the components of the manufactured product that are mined, produced, or manufactured in the United States is greater than 55 percent of the total cost of all components of the manufactured product..." the product is BABA Act compliant. Based on this definition, JM Eagle plastic pipe is compliant with the BABA Act. Additional information on BABA Act can be found here: [Build America, Buy America Act Provisions \(hud.gov\)](https://www.hud.gov/buildamerica).

If you need further assistance, please send your request to contactjm@jmeagle.com

Sincerely,

A handwritten signature in black ink, appearing to read "C. Clark".

Chuck Clark
VP of Production
