JM EAGLE DISTRIBUTOR LOCATOR—NEW AND IMPROVED

Contractor customers in search of the pipe they need can now find sources in a flash with the new and improved JM Eagle Distributor Locator feature at www.jmeagle.com.

Launched this week, the new up-dates allow customers to search for at least one of six product categories via city, zip code (with a choice of radii) or distributor name. The search feature then provides a list of results, allowing users to “map it” or get directions from GoogleMaps.

“End users will find the updates to the Distributor Locator tremendously helpful,” says Neal Gordon, vice president of marketing. “It now takes the guesswork out of where to find high-quality JM Eagle pipe.”

Result listings now include street addresses and product categories distributors carry. Further narrowing the search is the icon that shows up on the map for a distributor

carrying a specialty product, like Eagle Loc 900 or Ultra-Blue.

“The new Distributor Locator is more than just a handy online resource,” says Gordon. “For the industry, its now a formidable directory of the leading distributors of plastic pipe throughout the country.”

To access the JM Eagle Distributor Locator, visit:
WWW.JMEAGLE.COM/DISTRIBUTORS/

The screenshot shows the JM Eagle website's Distributor Locator tool. At the top is the JM Eagle logo and navigation menu (HOME | COMPANY | PRODUCTS | REQUEST A QUOTE | DISTRIBUTOR LOCATOR | CONTACT US | SEARCH). The main heading is "DISTRIBUTOR LOCATOR". Below this, the "Distributor Locator" section explains that the tool provides a listing of JM Eagle's distributors. It includes input fields for "City" (with "Alabama" selected in the state dropdown), "Zip", and "Within" (with "10" miles selected). There are "OR" options for "Enter a zip code and distance" and "Enter Distributor Name". A list of product categories is provided with checkboxes, all of which are checked: Waterworks Pipe (C900 & C905), HDPE Pressure Pipe (IPS & DIPS), Irrigation and 2:1 Pressure Rated Pipe (IPS), Sewer Pipe and Fittings (Locked-in gasket), Plumbing Pipe (PVC Solvent Weld), and Electrical Conduit. A "Search" button is at the bottom. On the right, there is an image of a white truck and a "Related Links" section with links to "JM Eagle™ Locations", "JM Eagle™ Standard Warranty", and "Virtual Tour".

For more information, contact your JM Eagle representative at (800) 621-4404 or visit www.jmeagle.com.
