CUSTOMER CONNECTION

OCTOBER 2010

NEW HDPE COMMUNICATIONS DUCT BROCHURE

JM Eagle has produced a new brochure for its HDPE Communications Duct product.

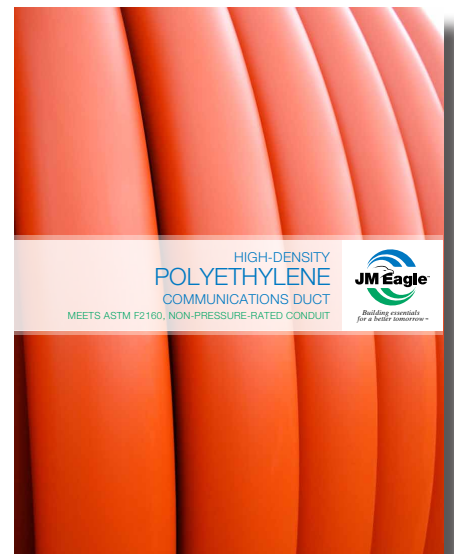

Available now in PDF form at www.JMEagle.com, the new brochure provides complete information about the product, including its full description, applications, short form specs, dimensions and weights, and warranty.

"The addition of the HDPE Communications Duct piece to the JM Eagle Product Catalog rounds out the full range of information our customers need to order their pipe," says JM Eagle Vice President of Marketing Neal Gordon. "The full product catalog is also an excellent reference for engineers when they specify products."

The HDPE Communications Duct brochure comes as JM Eagle has completed two-sided fliers for each product in its line, including HDPE Communications Duct. HDPE Communications Duct is just one item in a complete line of electrical and telecommunications products that includes Type C; Schedule 80; DB 120, 100 and 60; and EB 20 and 35.

JM Eagle's other specialty products in the same category are Gas Sleeve and Eagle Loc. In addition, JM Eagle's Electrical Fittings line includes more than 3,000 SKUs in Schedule 40 Fittings, Couplings, Special Radius Sweeps, Boxes, Spacers, and Schedule 40 and 80 Standard Radius Elbows. Since last year, JM Eagle has offered its fittings coast to coast.

"JM Eagle offers the complete line of electrical and telecommunications products," says Gordon. "This accompanying literature puts all the information about them at customers' and specifiers' fingertips."
