**MADE IN AMERICA**

## LEADING PVC, PE & ABS PIPE MANUFACTURER IN THE WORLD

- Enough pipe produced annually to circle the globe 12 times.
- In business since 1982, under consistent family ownership.
- Workforce of over 1,200 employees and revenue exceeding \$2 billion.
- 17 manufacturing plants in the U.S., plus 2 strategically located distribution centers.
- A 100-truck fleet and Ascending Eagle ensure fast, reliable shipments—delivered by the people who make the pipe.
- Combines advanced product technology with state-of-the-art automation to ensure industry-leading quality.

## ONE STOP SHOP

**We are the only plastic pipe manufacturer that makes everything**

- Average Plant Manager tenure is 24 years.
- Offers every type of plastic pipe from PVC, to PE, to ABS.
- Widest range of high-grade, high-performance plastic pipes in the industry.
- Strength lies in both product diversity and a skilled, diverse workforce nationwide.

## Our Partnership

- Meets evolving market needs to stay competitive in plumbing, electrical, and infrastructure sectors.
- Supports American jobs and local economies through domestic production and distribution.
- Committed to delivering life's essentials with eco-friendly, reliable pipe products that support health and quality of life worldwide.

## STRATEGIC MANUFACTURING LOCATIONS

# THE INTERSECTION OF EXCELLENCE

## LARGEST SELECTION

The only manufacturer offering every type of plastic pipe, from PVC, PE to ABS, serving diverse needs.

## BEST VALUE

Innovative high-quality products, sustainably manufactured and offered at competitive prices.

## SERVICE

Reliable, on-time delivery backed by Ascending Eagle Trucks and a focus on service, reliability, and consistency. Clear communication and reliable, consistent product stocks create a customer-first approach.

## BENEFITS

**50 YEAR**  
WARRANTY

## INSTALLATION

- Field-cut with a power saw or handsaw; bevel without complicated machinery.
- Does not need lining, wrapping, coating, or cathodic protection to prevent galvanic corrosion

## FEATURES

- Corrosion resistant, safe, long-lasting, and stable solution for a modern infrastructure.
- Consistency in carrying capacity (flow coefficient, C-150), for savings in pumping cost, and size of the pipe.

\*50 year warranty only applicable to C900/Eagle Loc 900, C909, AWWA C901/C906. Check [www.jmeagle.com/warranty](http://www.jmeagle.com/warranty) for full details.

## BENEFITS

### INSTALLATION

- Bell geometry engineered specifically for seismic applications.
- Up to 75% lighter than ductile iron for equivalent sizes, allowing for safe and simple installation.
- Field-cut with a power saw or handsaw; bevel without complicated machinery.
- No lining, wrapping, coating, or cathodic protection is needed to prevent galvanic corrosion.

### FEATURES

- Break, crush, and notch resistant.
- Great impact strength, tensile strength is 77% higher compared to regular PVC.
- Consistency in carrying capacity (flow coefficient, C-150), for savings in pumping and material costs.
- PVCO holds a hydrostatic design basis (HDB) of 7,100 psi vs. 4,000 psi for conventional PVC.

\*50 year warranty only applicable to C900/Eagle Loc 900, C909, AWWA C901/C906. Check [www.jmeagle.com/warranty](http://www.jmeagle.com/warranty) for full details.

- No lining, wrapping, coating, or cathodic protection is needed to prevent galvanic corrosion.

## FEATURES

- Break, crush, and notch resistant.
- Great impact strength, tensile strength is 77% higher compared to traditional PVC.
- Corrosion resistant, safe, long-lasting and stable solution for a modern infrastructure.
- Consistency in carrying capacity (flow coefficient, C=150), for savings in pumping and material costs.

\*50 year warranty only applicable to C900/Eagle Loc 900, C909, AWWA C901/C906. Check [www.jmeagle.com/warranty](http://www.jmeagle.com/warranty) for full details.

## INSTALLATION

- Feasible for multiple applications: open-trench and casing applications.
- Easy installation: simple push-on assembly.
- Field-cut with a power saw or handsaw: bevel without complicated machinery.
- Eagle insertion stop prevents over-belling/over-insertions.

## FEATURES

- Unaffected by corrosive elements: sewer gas, sulfuric acid, alkaline, or acidic soils.
- Consistency in carrying capacity (flow coefficient, C=150), for savings in pumping and size of pipe.
- Does not need lining wrapping, coating or cathodic protection to prevent galvanic corrosion.

### RING-TITE JOINT

Flexible elastomeric Rieber® locked-in gasket provides a tight seal that protects and compensates for expansion, contraction, vibration, or other movements.

Quick and easy to assemble with a simple push, there's no field mixing or application of cement.

Meets or exceeds ASTM D3139 for joint tightness, including a 22-inchHg vacuum and a 25-foot head pressure test.

• Rieber® sealing ring provides tight, flexible seal.

• Spigot pipe ends are supplied from the factory with bevels.

• The bell is an integral part of the pipe length with the same strength.

## BENEFITS

## INSTALLATION

- Lightweight, with long laying length, great for easy transportation and installation.
- Pipe applicable for open-trench and slip-lining installation.

## FEATURES

- Extremely durable, corrosive, gouging and abrasion resistant.
- Features 100 years design life per Florida DOT.
- Great flexibility, and highly suitable for earthquake-prone areas.
- Highest PE pressure rating, resistance to slow crack growth and rapid crack propagation.

\*50 year warranty only applicable to C900/Eagle Loc 900, C909, AWWA C901/C906. Check [www.jmeagle.com/warranty](http://www.jmeagle.com/warranty) for full details.

## BENEFITS

## INSTALLATION

- Lightweight, with long laying length, great for easy transportation and installation.
- Pipe applicable for open-trench and slip-lining installation.

## FEATURES

- Extremely durable, corrosive, gouging and abrasion resistant.
- Features 100 years design life per Florida DOT.
- Great flexibility, and highly suitable for earthquake-prone areas.
- Highest PE pressure rating, resistance to slow crack growth and rapid crack propagation.

\*50 year warranty only applicable to C900/Eagle Loc 900, C909, AWWA C901/C906. Check [www.jmeagle.com/warranty](http://www.jmeagle.com/warranty) for full details.

## BENEFITS

**JM Eagle's Pure Core™ pipe and tubing is the superior choice for water service lines because it:**

- Does not rust, corrode or accumulate mineral deposits or chemicals.
- Resists growth of algae, bacteria and fungi.
- Boasts high flexibility, allowing it to be curved over, under and around obstacles for easy installation.
- Up to 77% lighter than copper tubing.
- Facilitates rapid, joint-free installation with long coil lengths.
- Features color-coded tags for easy identification of product and pressure rating.

WASTEWATER ACCESS CHAMBER

Product One Sheet >

# WAC 15

## WASTEWATER ACCESS CHAMBER

### APPLICATIONS

The JM Eagle Wastewater Access Chamber (WAC 15) may be used in place of standard concrete manholes, cleanouts, dead-end manholes, or sampling ports, or used in any location in a sewage or storm drainage collection system that requires access for maintenance and inspection.

### DESCRIPTION

WAC 15 features a body that is a sturdy 3/8-inch thick, with one-piece construction.

Its smooth interior improves the flow ( $n = .009$ ) through molded inverts. It is large enough for easy insertion of CCTV equipment and high-pressure cleaning equipment, yet too small for human entry.

The water-tight lid with gasket installs in top of the riser. Due to its 15-inch size, the riser remains independent of the standard ring and cover.

### BENEFITS

**WAC 15 not only provides a long-lasting, cost-effective alternative to concrete, it is also effective in minimizing the dangers involved in human entry into confined spaces.**

- It is lightweight for easy handling at the job site and light in color for better visibility in the interior.
- It is economical compared to conventional manholes, incurring lower installation costs and offering corrosion resistance, resistance to damage in shipping, flexibility under earth loads and watertight performance.
- Its smooth interior reduces cleaning frequency, and maintenance is simplified with no man entry and resistance to damage from mechanical cleaning equipment.

## WASTEWATER ACCESS CHAMBER

### 15" WAC PRODUCT SPECIFICATION

#### General

The Wastewater Access Chamber (WAC) may be used in place of standard concrete manholes, cleanouts, dead-end manholes, or sampling ports, or used in any location in a sewage or storm drainage collection system that requires access for maintenance and inspection equipment, without man entry. The chamber body is a one-piece, rotational molded polyethylene unit that is corrosion resistant, lightweight and designed for use in both traffic and non-traffic locations where the sewer pipe is 9-, 8-, 10- or 12 inches in diameter. The chamber is adaptable to clay, cast iron, ductile iron, PVC or concrete pipe through use of flexible couplings.

#### PHYSICAL DIMENSIONS

- Length of body shall be 43.75" +/- 0.50"
- Height shall be 37.75" +/- 0.50"
- Thickness shall be an average of 0.375"
- Width shall be 18.75" +/- 0.50"
